

Approved Pharmacy Technician Training Programs - FAQ

Updated 3.20.2018

Pharmacy technician training programs must meet either of the following requirements:

OPTION #1 - For Registered or Certified Technician Applicants: Any approved training program as outlined in [rule 4729:3-3-02 of the Ohio Administrative Code](#). Effective April 6, 2019, all pharmacy technician training programs must meet the requirements set forth in this rule.

OPTION #2 (Only valid until April 6, 2019) - For Registered or Certified Technician Applicants: [Submit an attestation](#) from a pharmacy's responsible person that the applicant has completed a pharmacy technician training program that is of appropriate breadth and depth to clearly address the competencies for a technician to safely and effectively work in that particular setting and includes instruction in all of the following:

- a. Packaging and labeling drugs;
- b. Pharmacy terminology;
- c. Basic drug information;
- d. Basic calculations;
- e. Quality control procedures;
- f. State and federal statutes, rules, and regulations regarding pharmacy technician duties, pharmacist duties, pharmacy intern duties, prescription or drug order processing procedures, drug record-keeping requirements, patient confidentiality, security requirements, and storage requirements.

IMPORTANT: Technicians engaged in drug compounding must complete site-specific training in accordance with USP 797 and 795. Site specific training requirements are listed in rules [4729:3-3-02](#), [4729:3-3-03](#), and [4729:3-3-04](#) of the Ohio Administrative Code.

To assist in the implementation of the training standards, the Board has developed the following frequently asked questions document.

If you need additional information, e-mail the Board at technician@pharmacy.ohio.gov.

Q1) What are the approved training programs in [rule 4729:3-3-02 of the Ohio Administrative Code](#) (i.e. OPTION #1)?

A1) The following are considered approved training programs:

1. A pharmacy technician training program that holds a current accreditation from the [American Society of Health-System Pharmacists](#).
2. A program of training for pharmaceutical technicians conducted by a branch of the Armed Forces of the United States, the Indian Health Service of the United States Department of Health and Human Services or the United States Department of Veterans Affairs.
3. An employer-based training program that meets the requirements of the rule.
4. A pharmacy technician training program offered by an Ohio public high school as part of a career-technical education program approved by the Ohio Department of Education pursuant to section [3317.161](#) of the Revised Code. Each career-technical education program shall require approval by the Board. For more information on the approval process, visit: www.pharmacy.ohio.gov/TechHS

Q2) I am a pharmacy technician training program at a vocational school that is not part of a public high school career-technical education program (i.e. career college, community college, etc.). How do I become an approved training program?

A2) Until April 6, 2019, the program may continue to utilize OPTION #2. However, after April 6, 2019, the program would have to hold a current accreditation from the [American Society of Health-System Pharmacists](#) by April 6, 2019. **NOTE:** The Board does not plan to grant any extensions to obtain an active accreditation at this time.

Q3) I am a pharmacy technician training program at a vocational school that is not part of a public high school (career college, community college, etc.). How do I submit an attestation from a pharmacy's responsible person to meet the requirements of OPTION #2?

A3) It is the Board's understanding that all vocational training programs have an experiential component as part of the training process. Therefore, such programs will have to rely on the responsible persons at the experiential training sites to provide a student who have successfully completed the program with the required [attestation](#) to meet the requirements of OPTION #2.

Q4) How do I know which high school career-technical education programs have been approved by the Board?

A4) All high school career-technical education programs approved by the Board will be posted to the pharmacy technician registration page: www.pharmacy.ohio.gov/tech.

Q5) I am working to update my employer-based training program. Can I use outside resources to fulfill the didactic training requirements?

A5) Yes. Paragraph (B)(2)(b) of rule [4729:3-3-02](#) allows didactic training to consist of the following:

Didactic training may include self-directed learning experiences, including but not limited to home study, computer programs, internet or web-based courses, or any other coursework approved by the program director.

NOTE: Didactic training is a part of the training program that does not require a separate simulated or experiential setting. It must progress from more basic to more complex information, concepts, and skills.

Q6) For an employer based program, can I meet the didactic testing requirements using a series of modules (i.e. assessments following each didactic topic) that add up to a total of ninety questions?

A6) Yes. However, the program must be able to demonstrate that the student received at least seventy-five percent as a passing score if all the module test questions were combined into a single examination.

Q7) Do my program participants need to be registered as technician trainees?

A7) If program participants are engaged in any activity outlined in rule [4729:3-3-01](#) of the Administrative Code, then they must be registered as pharmacy technician trainees.
