

eLicense Account Guidance – Pharmacy Technicians

Updated 4-20-2018

The State of Ohio Board of Pharmacy (Board) is transitioning to Ohio's new eLicense system. Effective April 10, 2018, the Board's current system went offline to transfer existing data to the new system. Creating this account will allow you to submit requests, make changes to your current registration (such as name and address changes) and where you will renew your registration. All applicants and registrants are required to create an account.

If you are a technician applicant and **DO NOT** have an active license as of April 13, 2018, after creating your account you must submit any missing required documentation via the eLicense system using the submit additional documentation feature.

Information on creating an account and instructions on submitting additional documentation can be accessed under the eLicense Guide section of the pharmacy technician website: www.pharmacy.ohio.gov/tech.

If you need help logging in, registering, creating an account, or have any other technical issues with eLicense Ohio, please call the eLicense Customer Service Center at 855-405-5514, Monday-Friday, 8:00am to 5:00pm.
